## New EliSpots available at ArminLabs

Dear Sir or Madam

As of now, ArminLabs offers further EliSpot assays for the following bacteria / viruses:

- Bartonella henselae
- Babesia microti
- Mycoplasma pneumoniae
- Varicella zoster virus

The EliSpot (Enzyme-Linked ImmunoSpot) is part of the Interferon Gamma Release Assays (IGRA). ArminLabs has now further expanded its range of EliSpot analyses by the ones named above.

The following EliSpot tests have been available at ArminLabs so far – and of course still are:

- Borrelia burgdorferi
- Borrelia myamotoi
- Ehrlichia / Anaplasma
- Chlamydia pneumoniae
- Chlamydia trachomatis
- Yersinia
- Epstein–Barr virus
- Herpes simplex virus 1 / 2

Please add the desired test on the laboratory order form by hand if the test is not yet listed on it.

Material: 1 x CPDA blood tube

We offer the new Elispot tests at the same price as the Yersinia EliSpot.

Yours sincerely

Your team at ArminLabs
